De Dietrich

PRESENTS THE *PIANO*

The versatile *Piano* hob is at the pinnacle of induction innovation. Developed by De Dietrich, a brand renowned for ground breaking innovations in kitchen appliances and leaders in the field of induction technology. De Dietrich was the first to introduce domestic induction to the marketplace and has continued to pioneer ever more sophisticated technologies in this arena. The first generation of zoneless induction hobs were launched in 2007 and today, the award-winning *Piano* takes the 'zoneless' induction concept to new levels – delivering the ultimate in cooking freedom.

COOKING FREEDOM

The revolutionary 93cm *Piano* induction hob features full 'zoneless' cooking for up to 5 pans.

The intuitive interface on the full colour TFT screen, combined with the Quick User Guide, makes the *Piano* hob simple and easy to use. Time and temperature can be individually and confidently controlled with an effortless touch.

THREE COOKING STYLES TO SUIT ANY NEED...

... EXPERT MODE

This utilises the entire 81cm x 40cm cooking area. Up to five differently sized pans may be placed on the hob and it will detect the pan's presence, wherever it is situated. Choose the power level (from 1 -15 or maximum Boost) and select the cooking time. Should the pan be moved anywhere on the hob, sensors will automatically ensure that the temperature remains constant, delivering total 'zoneless' cooking.

... PIANO MODE

The cooking surface is converted to three separate cooking zones, which reflect the design of a piano keyboard. Pans can be added to each zone, as required, and the temperature of each zone can be precisely adjusted to suit the cooking requirements.

... SOLO MODE

Designed to emulate a professional chef's traditional style of cooking, solo mode creates a single temperature across the entire cooking area. Every pan is heated at the same temperature, making it ideal for simmering or keeping food warm.

TECHNOLOGICAL KNOW-HOW

With heritage and experience, De Dietrich brings you the best in innovation, performance and design

Challenging all previous induction hob concepts, the award-winning *Piano* delivers the widest 'zoneless' area available, offering total cooking freedom and versatility. Multiple inductor sets featured in a revolutionary triangular formation below the ceramic surface, allow automatic detection wherever the cookware is situated.

TOUCH AND PLAY...

... AN INTUITIVE TFT TOUCHSCREEN MAKES COOKING SIMPLE

The *Piano*'s Matrix control panel incorporates a full colour TFT touchscreen which is intuitive and easy to use: as soon as the hob is turned on, the control panel is activated and guides the user through the options available. Once the cooking option is chosen, a touch-sensitive slide control can adjust the cooking temperatures accordingly.

DTiM1000C

93cm total 'zoneless' induction hob

- 'Zoneless' cooking for up to 5 pans simultaneously
- 3 cooking modes: Expert, *Piano*, Solo
- Full colour TFT touch screen control
- 16 power settings: including 5 separate boosters
- Touch slider temperature control
- 5 programmable timers with delayed start
- 5 separate minute minders: up to 99 minutes
- Elapsed time display
- 10 safety features
- DVD pack: Quick Start Guide and Pierre Gagnaire DVD.

Overall appliance (mm): H97 x W930 x D520
Cut out (mm): H90 x W900 x D490
